

# **LDAP servers, current status, standard schema extensions, interop**

Introduction by  
Radovan Semančík (Evolveum)

TIIME Workshop, February 2019, Vienna

# Server Quality: Standard Compliance

Based on experiences with midPoint LDAP identity connector

OpenLDAP

Good, but not perfect

Majority of other  
servers are here  
somewhere

389ds

Oh my goodness ...

**GOOD**

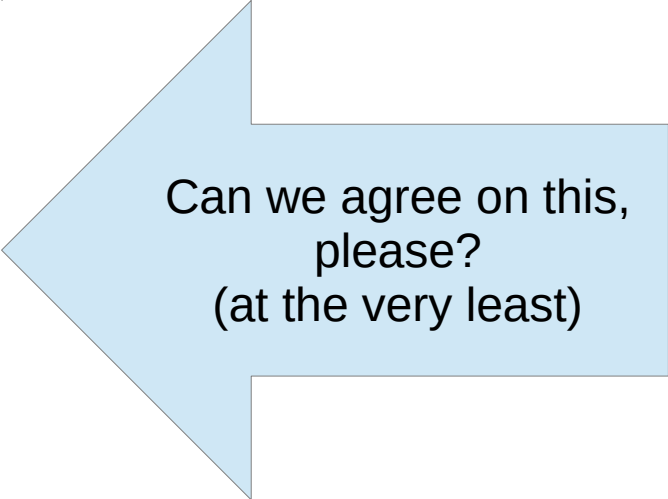

**BAD**

# Is Standard Compliance Enough?

- Even if server is standard-compliant, that still does **not** provide interoperability
  - groupOfNames vs groupOfUniqueNames vs posixGroup vs roles
  - memberOf
  - **How to disable an account?**
  - Password lockout?
  - Paging: SPR vs VLV
  - Changelog

# Is Standard Compliance Enough?

- Even if server is standard-compliant, that still does **not** provide interoperability
  - groupOfNames vs groupOfUniqueNames vs posixGroup vs roles
  - memberOf
  - **How to disable an account?**
  - Password lockout?
  - Paging: SPR vs VLV
  - Changelog

Can we agree on this,  
please?  
(at the very least)
